

4.8 LITTLE CYLINDRICAL ALUMINIUM POSTS TYPE SA

Little light posts type SA are completion for our offer of aluminium products. They are designed to light streets at trade centres and at parking lots as well as at representative buildings entrances. They can be also used inside the buildings e.g. for decorative lighting in big halls.

They are made of aluminium pipe with external diameter of $\varnothing 150$. In upper part they have built-in cover with transparent or opal cylindrical light bowl made from polycarbon. The sort of light bowl is specified in the product name in following way:

SAP – little posts with transparent light bowl and reflector

SAM – little posts with opal light bowl

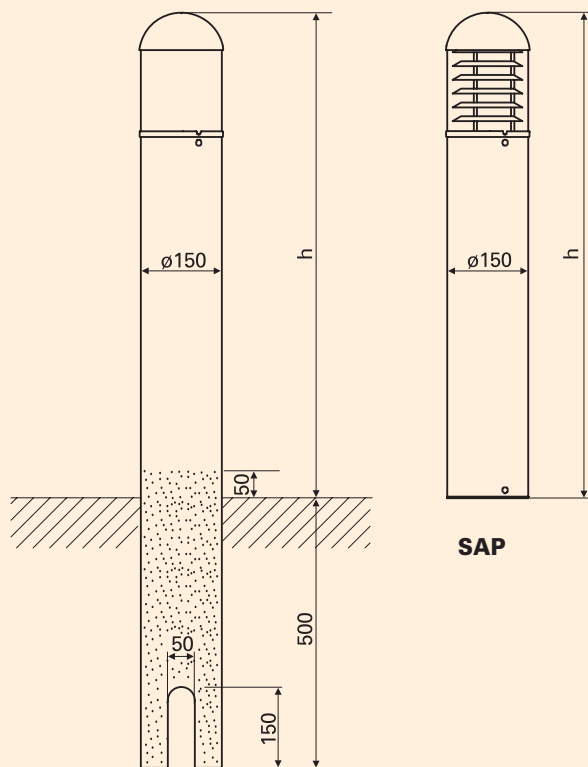

Posts type SAP and SAM can be mounted:

- to solid ground by three stretcher-pegs,
- on concrete base B-0,
- or dug directly into the ground (marked additionally "dz")

Those products are made in three standard heights over the ground level: 600, 900 and 1200. Little posts type SAP 1200, SAM 1200, SAP 1200 dz and SAM 1200 dz can be made with fuse-board niche and then they are additionally marked with letter "W" e.g. SAM 1200 W or SAP 1200 dz W.

Little posts apart from standard aluminium construction can be also painted with any colour. Frame built-up in the upper part is equipped with electric hardware adapted to sources of light with handle E-27 sodium, metal halide, mercury and glow bulbs or energy-saving.

Electrical equipment is installed on universal mounting frame protected with cover made from polycarbon with insulation class II.

SAM...dz

Type	Type of light source	Power [W]	Height h [mm]
Little light posts SA-600, SA-900, SA-1200			
SA-.../S50	sodium E-27	50	600
SA-.../S70	sodium E-27	70	
SA-.../MH70	metal halide E-27	70
